Application For the post of Software Engineering/Web Application Development Internship

I am writing to formally express my interest in the Software Engineering/Web Application Development Internship position at Softmaster Technologies. With Softmaster's strong reputation as one of Sri Lanka's most trusted software solution providers—and over 23 years of excellence in delivering scalable ERP and business software, I am eager to contribute to and learn from such a distinguished organization.

I am an aspiring Full Stack Developer with strong skills in front-end and back-end development. I create responsive interfaces using HTML, CSS, and JavaScript, and build server-side functions and APIs using Java. I also work with MySQL for database management and use Power BI for data analysis. These skills help me understand and work through the complete software development process.

I am highly motivated by Softmaster Technologies' focus on quality, customer-first service, ISO 9001 standards, and its strong record of delivering customized, practical solutions. I believe an internship at your company will help me grow professionally, while also giving me the chance to make a meaningful contribution to your projects.

Please find my CV attached for your review. I would welcome the opportunity to discuss my application further and am available for an interview at your earliest convenience.

Thank you for your time and consideration.
